

CYBERPOWER: POWERING PRODUCTIVITY

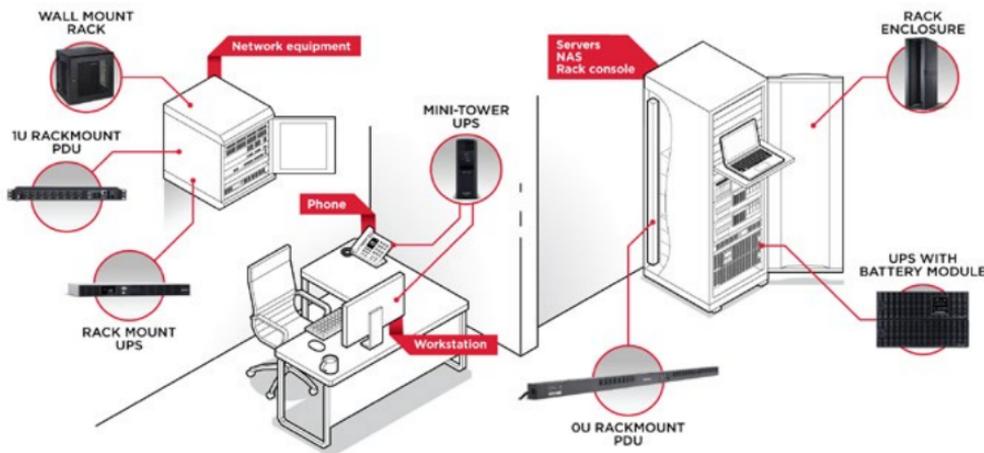

Powering Your Business. Protecting Your Productivity.

CyberPower is your ultimate ally in power and equipped to support the power protection demands of today's technologies. Stay connected and protected with professional-grade power protection from CyberPower.

Advanced Power Solutions

CyberPower state-of-the-art power systems are built for the hyperconverged infrastructure of today's advanced data centers. Our Smart App Online UPS systems provide the efficiency, flexibility and scalability needed to integrate with the latest technologies including networks, IoT, Cloud applications and IP Telephony.

Power Map Example:

More Power. Less Space

CyberPower Smart App Online High-Density UPS systems can be configured into 2U of rack space or as a tower, compared to 3U and 4U for similar competitive UPS models. Using less space allows for more flexibility and room to grow.

Efficiency

Smart App Online UPS systems ensure maximum efficiency and capacity output with a Power Factor rating (PF) of 1. The energy-saving GreenPower UPS™ ECO Mode is 96% efficient which reduces power consumption and thermal dissipation. The 7-speed fan automatically adjusts speeds to save energy and reduce noise.

Why CyberPower?

Organizations across virtually every industry have come to rely on CyberPower to keep their mission-critical operations running smoothly. Here's why:

Value

CyberPower delivers high quality power products for a low price. As a true manufacturer, CyberPower controls quality at every step of the production process and supply chain. For you it means prices up to 20% lower than our competition and power protection when you need it.

Reliability

Creating a superior product allows us to offer the strongest warranties in the industry with three-to-five-year warranties on all UPS systems including batteries. Plus, we guarantee to repair or replace properly connected equipment if damaged by a power surge.

Innovation

Constantly developing power protection with the latest and most comprehensive features in the market has been the key to our growth. We lead in many categories including ENERGY STAR® certification, LCD functionality, and battery management technology.

Support

Our sales support team provides timely product recommendations, demo programs, and free virtual power audits. We are responsive, flexible, and ready to work with you.

“For the overall combination of features, price, reliability, you’re never going to get a better system.”

- Mike Poteet, Director of Information Technology, Ursus Systems
