

# Elevate Your Customer Experience with Projectors for Digital Signage

## Create one-of-a-kind experiences.

Realize your vision and design experiences that transform emotions and create action. From advertising on a giant curved wall to intricate projection on products—no project is too small or too large.

## Why use projection for digital experiences?

Projectors enable you to create engaging, captivating experiences by adding a layer of content on almost anything.

## Enhancing Retail Spaces with Creative Projection

When IKEA needed a digital signage solution that was just as reliable as it was innovative, they turned to Epson Projectors, creating flexible, captivating displays that both attracted and engaged customers.

## Laser Projectors are Key to Immersive Environments

Temple House, an exclusive event space in Miami Beach, leverages the power of Epson laser projector technology for awe-inspiring projection mapping to dramatically transform their space for different occasions. See how projection can be used to reinvent an experience, without changing anything else!

## A Beam of Light

Light and darkness. There's nothing more elemental or more moving. See how artist, Michael Skura, illuminated more than 1,000 of his beautiful hand blown and molded glass sculptures with pure laser light from 19 Epson LightScene® and three PowerLite® L615U laser projectors.

# Make the ordinary extraordinary.

Push the boundaries of space and digital content to deliver environments that inspire people to stay longer, spend more time and leave with a memorable experience.

With our expansive lineup of products, the possibilities are endless. And, with Epson projectors, you can count on extraordinary image quality, as well as industry-leading service and support.

## Interchangeable Lens Projectors

Ideal for Larger-than-life Experiences

Packed with state-of-the-art technology, they feature sophisticated software that enables color uniformity, easy edge-blending, curved wall projection, as well as collection of lenses and more.

## Fixed Lens Laser Projectors

Ideal for Dynamic Imaging in Smaller Spaced

With a fixed lens and a host of innovative features, these portable powerhouse projectors deliver brilliant video and professional-grade reliability.

## Accent Lighting Projectors

Ideal for Experiential, Any-surface Projection

Sleek spotlight performers, they can transform retail spatial design while blending in with premium, upscale environments. Unique software, special filters, and customized templates enable them to display information in a way that truly captivates.
