ENDPOINT PROTECTION

ESET's endpoint technology relies on a multi-layered approach to security, built off of **3-pillars: ESET LiveGrid, Machine Learning and Human Expertise**. All ESET Endpoint Security products have the ability to detect malware pre-execution, during execution and post-execution.

ESET CLOUD OFFICE SECURITY (SKU: ECOS)

Provides advanced preventive protection for Microsoft 365 applications against malware, spam and phishing attacks via an easy-to-use cloud management console to protect your company communication and cloud storage.

Key Benefits

- › Cloud-hosted or not, email remains a key attack vector for spam, malware distribution and phishing.
- › Protection for Exchange Online, OneDrive, SharePoint Online and Teams.
- › ECOS can be deployed in 5-minutes

ESET INSPECT CLOUD (SKU: EIC)

ESET Inspect, the XDR-enabling component of the ESET PROTECT platform, is a tool for identification of anomalous behavior and breaches, risk assessment, incident response, investigations and remediation. It enables incident responders to monitor and evaluate all activities in the network and on connected devices. It also helps automate immediate remedial actions, if needed. ESET's 800+ (and counting) detection rules enable comprehensive threat hunting.

ESET CYBERSECURITY AWARENESS TRAINING (SKU: ECAT)

A comprehensive and interactive gamified security awareness training for businesses to ensure employees are trained on IT best practices. The training is equipped with a realistic phishing simulator tool to reinforce material and test employee knowledge. Tracking and reporting is available to admins through an easy to use dashboard.

ESET PROTECT MDR

With ESET MDR, not only do you get the world's best multilayered prevent, detection and response solutions, but also improved protection against ransomware and zero-day threats via cloud-based sandboxing technology and unparalleled ESET expertise to ensure you make the most of them all, thanks to on-call Premium Support
